

THE UNBEATABLE COMBINATION FOR PRE-WASHING

Grab our free starter pack
and save time and money with the TurboZyme process.

UF Series. Part of your passion.

TURBOZYME – IDEAL FOR TACKLING TOUGH STAINS

Winterhalter makes manual pre-washing of utensils a thing of the past. Specially developed for the UF Series of utensil washers, the TurboZyme process dissolves all types of tough stains before the start of the wash cycle, thus saving time and money.

Perfectly geared to your washing needs

Every UF Series utensil washer comes with the option of the TurboZyme process.

This includes:

- ▶ The special soaking programme
- ▶ The dosing device for the crust cracker
- ▶ The crust cracker – an environmentally friendly, enzyme-based pre-cleaner

Mechanical pre-washing – innovative, time-saving, environmentally friendly

The TurboZyme process is exclusive to Winterhalter:

- ▶ It replaces manual pre-washing
- ▶ It saves time, money and space
- ▶ It saves on manual work and materials
- ▶ It protects the environment
- ▶ TurboZyme: another innovation from Winterhalter

Early-bird saving
